DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 – 26, drawn to a bone implant.

Group II, claim(s) 27, drawn to an implantation set.

Group III, claim(s) 28 – 35, drawn to a method for producing a bone implant.

Group IV, claim(s) 36 – 45, drawn to a method of implanting a bone implant.

2. The inventions listed as Groups I, II, III, and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical feature in Group I, the bone implant with regions that are liquefiable by mechanical oscillation, is already known in the art, as is exemplified by US 6,921,264. Therefore, there is no special technical feature in these groups that is not already well known in the art.
